Ari Marketing: Weekly Planning with Siva

Metadata

Title: Ari Marketing: Weekly Planning with Siva
Location: Meet
Date: 2026-04-13T02:02:28Z UTC
Attendees: Ari Vivekanandarajah, Karen Grlic, Kate Aston, Siva Gounder
Link: https://app.meetgeek.ai/meeting/6d0e0a87-a8d9-4a29-9c78-515ad44a7f7f
Agenda:
30-Minute General Meeting AgendaOpening and Welcome (1 minute)Quick welcome and introduction to the meeting's objectives.Review of Action Items (3 minutes)Brief update on the status of action items from the previous meeting.Key Discussions (20 minutes)Focused discussion on one or two key issues that need input or decision-making.Time-bound to ensure brevity and relevance.Next Steps (3 minutes)Quick summary of action items arising from the meeting's discussions.Assigning of responsibilities for these items.Wrap-Up (3 minutes)Final thoughts or comments.Confirm the time for the next meeting.

MeetGeek Transcript

Kate Aston - 00:00
How are you guys, you still have a good weekend?
Yeah.
I'm like pretty low, it's freezing in Melbourne and I was feeling a bit under the weather, so I didn't really... I worked Sunday, but... Saturday, I pretty much didn't leave the couch, which is so unusual for me.
I can't remember the last time I sat on the couch all day, but I watched my team win, so I'm happy Brisbane won.
So...

Karen Grlic - 00:34
All

Kate Aston - 00:35

is good.

Karen Grlic - 00:36
Maybe maybe Maya inspired you with her pajama day on Friday.
Totally.

Kate Aston - 00:41
Yeah, I took, you can tell her I took a leaf out of her book.
Hey

Karen Grlic - 00:48
guys, sorry,

Siva Gounder - 00:49
running a bit late.
It's been a busy, busy morning.
All right, so Ari, I invited Karen just for a bit of context.
One of the things, and I spoke to Jerry just earlier as well, And I just want to get more alignment through our sales and marketing function.
Because previously we were running off doing different projects and different things.
And now that you're here, Kate, handling sales, we've got Ari doing marketing.
That's really important to get that team on the same page.

Siva Gounder - 01:23
And also, Karen is going to be a key supporter of this, like actually just to operationally run manage support.
So that's why Karen is here.
So that's probably the reason.
So the, and just maybe for your benefit, Karen, because I know Ari and Kate already know this, is that we wanted to create a enterprise marketing strategy.
Eventually we'll tack on the sales bit as well, but the enterprise marketing strategy as a simple plan.
to then effectively get alignment and show the team and say, this is what we're doing.
We're going in this direction so that if we're pulled in different directions, we can say, well, no, this is the plan.

Siva Gounder - 02:07
So that's... Then

Karen Grlic - 02:08
there's lots of pulling, Paul Yubari.

Ari Vivekanandarajah - 02:13
Yeah.
Yeah, and the

Siva Gounder - 02:15
part of the reason is that not being aligned on the same page, right?
So hopefully this helps.
I don't expect it to be a perfect silver bullet, but at least we'll have the plan.
Yeah.
So there's our context.
We can jump in if you don't want to add, if nobody wants to add anything else.

Karen Grlic - 02:37
All good.
As we go along, I might ask questions because I had a lot on Friday afternoon and this morning, so I'm happy to just Listen for a bit and I'll try to listen,

Siva Gounder - 02:50
listen for a lot, let Ari go to the thing.

Karen Grlic - 02:53
Oh no, I'm excited for this.
And then we'll ask, yeah, we'll ask questions again.
I'll go mute.

Siva Gounder - 03:03
Far away, mate.
All right,

Ari Vivekanandarajah - 03:05
so just before we jump into the enterprise There's a lot of more being, which I just want to get this.

Siva Gounder - 03:22

that just me or is Ari, is it losing Ari, Kate or Karen?
We are.
I think it might be your...

Ari Vivekanandarajah - 03:32
No, no, I was just plugging everything in, I think just... Oh, yeah, back.
Yeah.
So let me share my screen.

Siva Gounder - 03:54
So

Ari Vivekanandarajah - 03:58
just quick updates.
The Google Ads are now live.
The plan was to try and get both Google and Meta firing.
Just some quick stats of what we are seeing inside of Google.
So we spent about $250 since the campaign went live.
We have about 11 conversions, if I'm mistaken.
11 conversions and $23 per conversion.

Ari Vivekanandarajah - 04:36
Now, the quality of a Google conversion should be a lot better than a quality of a meta conversion.
Meta, they're seeing an ad, there's no real need.
Here they're searching for something and the ad being triggered by that.
Now, ideally we want to push this down and I'll provide context into where these are kind of coming from.
So you can see these are the kind of conversions and these are the keywords that triggered those conversions.
So oops, I'm sorry.
the keywords that have triggered these conversions.

Ari Vivekanandarajah - 05:15
Now, with Google, if we just let it run, it was going to bring in keywords and clicks that we don't want to be paying for.
And you'll see it if I extend this to clicks.
And change this to 200. We will see keywords in here.

Like, for example.
I'll need to, I need to

Siva Gounder - 05:59
research

Ari Vivekanandarajah - 05:59
and fight.
But what will happen is you'll end up getting these keywords which are not.
So one of the main things this week is to make sure we add some negative keywords into it.
Now in terms of conversion actions.

Siva Gounder - 06:13
And currently conversion is just a registration, right?
Because we

Ari Vivekanandarajah - 06:16
can't.
Registration, exactly.
Yeah, completed a sign up.
Right.
So we have all of the conversions that are coming through.
all the conversions, all 11 of them are signups completed, obviously, because it's only four to five days of data.
So I think, look, I will keep a close eye to see the type of leads that are coming in.

Ari Vivekanandarajah - 06:49
I think Michelle or Buck said that they will be releasing the tracking of HubSpot today, as per his email.
Is that right, Sima?

Siva Gounder - 07:00
Well, yes, that's, that's apparently it's going, it should be going live soon, but in the next hour, then Nish will QA, but then you, you're the ultimate stakeholder, so you'll need to check it.
Yeah,

Ari Vivekanandarajah - 07:12
so far we haven't got anything in here.
All the traffic sources are still offline.
What I'll try to do is I'll try to see if I can figure out if any of these actually came from Google Ads just by looking at the quality of the leads that are there.
And if any enterprise have come through.
So that's one.
Now we've got meta and Google firing.
We need to make sure we're on top of this, otherwise we're going to waste money.

Ari Vivekanandarajah - 07:40
And we also need to figure out how we kind of scale.
So hopefully this week with the other data points coming through, we should be good.
Then the other thing is... Yeah, the AI staff landing page done, Google done.
And then there's a couple of like the NBA presentations all updated for Jerry.
He sent more feedback and changes that he wants to be completed.
Then before we.
That

Siva Gounder - 08:23
pro this email template thing that you've got on that will Karen's going to send that out.
Okay.
It's got a typo, I just circled it and uploaded it.

Ari Vivekanandarajah - 08:33
Okay.

Siva Gounder - 08:34
Yeah, but otherwise, Karen will send that.

Ari Vivekanandarajah - 08:37
Right.
Yeah, I'll just

Karen Grlic - 08:38
so you know, I was just going to schedule it for the end of this month because everyone's on school holidays.
If you

Ari Vivekanandarajah - 08:44
are.
Yeah, bad enough.

Karen Grlic - 08:46
So we'll send that to Tape SA, Swin and RMIT.
I might also look at the Griffith uni for them as well.
And every month anyway, I'll send out the standard one that goes out to students in edu.au forward.
Yeah, the

Ari Vivekanandarajah - 09:04
other thing is Jerry wants this video subtitles updated.
I've tagged you guys.
I need the original video because, so he's saying the font on each of the videos are different, so he wants it all standardized, but I don't have this actual video.

Siva Gounder - 09:29
would

Ari Vivekanandarajah - 09:29
either of you have it.

Siva Gounder - 09:30
Brian who's in that video is the actual guy who made this.
So I guess Brian would need to get that to us.
What you want the raw and editable file?
Well,

Ari Vivekanandarajah - 09:45
I want a video with the other subtitles.
Well, just see if that's in there.

Karen Grlic - 09:51
Just yeah.

Siva Gounder - 09:53

Can you, I'll give you Brian's email, just email him and ask him and just copy me in.
Okay, cool.
Yeah.
You know, I mean, but also like why is probably my question on that one.
like on the scheme of things because the subtitles so the subtitles are the subtitles wrong are they are

Ari Vivekanandarajah - 10:15
they correct but then jerry wants it all to be standardized so that when people click it it's all the same yeah

Siva Gounder - 10:22
and that's a nice to have when we've got significantly bigger fish to fry right like making subtitles look pretty versus us actually executing on our enterprise builder plan i just i could i see them like this you know so I just don't think we should be doing that right now.
Yeah.

Ari Vivekanandarajah - 10:43
Cool.
Um, like you

Siva Gounder - 10:45
can, you can say yes, it's on the list, but I wouldn't spend your very limited resource with us, uh, doing subtitle edits.
Cool.
All

Ari Vivekanandarajah - 10:56
right.
Um, then, um,
Yeah, then I've got the pricing page needs to get updated.
The one that's on Render.
What was the other one I want to ask you guys?
Oh, yeah.
The other thing is we've set up tasklet.

Ari Vivekanandarajah - 11:31

So what this is, what this does is, Kate, this is mainly for you, I guess, and I guess also Karen.
So what this does is it is connected to HubSpot.
And what this will allow you to do is to chat, through chat, mine the data that is inside of HubSpot for enterprise clients that are low hanging.
So what I've done right now is I've connected it to HubSpot.
I've also told it to go and understand and define enterprise.
Now I haven't defined it too much because I want I don't know, we've got to get aligned on what an enterprise client is.
And so it's gone and done it, and it's also figured out, you know, how to, what a signed up user pro license versus free user is, and... And then it's created a list of kind of companies that are kind of signed up.

Ari Vivekanandarajah - 12:34
Again, we will refine this.
What we want to do, Kate, is make it easy for you so that you can just go and kind of chat to it and say, you know, what are the seven enterprise clients in the last seven days or, you know, from the beginning that we can kind of get and it'll easily generate that list for you rather than you having
to go through 42,000 records.

Karen Grlic - 13:00
Cool.
It's a,

Siva Gounder - 13:01
I already demoed this to me on Friday.
I was like, yes, this is so good.

Kate Aston - 13:06
This is really good.
This is

Ari Vivekanandarajah - 13:08
great.

Kate Aston - 13:11
This is like, this is all my dreams come true.

Ari Vivekanandarajah - 13:15
Yeah, because that will save you a lot of time.
Very much.

Karen Grlic - 13:18
Yeah,

Kate Aston - 13:19
absolutely.
Awesome.
This is just so good.
So

Ari Vivekanandarajah - 13:25
currently we are on the free plan and the email address is mine.
That's the only issue.
And Siva, so what happens is it is sending

Kate Aston - 13:35
me...

Ari Vivekanandarajah - 13:38
So when someone tries to log in is sending me the email, I guess I can do a like a forward to you guys when a task letter email comes to me so that you guys get the email as well.
And so therefore y'all can just click it and log it.
Can I say

Kate Aston - 13:51
that

Karen Grlic - 13:53
still come through as an email with the two factor in.
Sorry.
In one password.
And so again, just, yeah, or let's still send through an email.
Is

Kate Aston - 14:06
it worth setting up a like a sales at or sales and marketing or whatever, like a generic email address that we could share, then that way it's not kind of that manual remembering to forward stuff on.
No, no, what

Ari Vivekanandarajah - 14:24
I thought is I'll just set up an automation inside of my

Kate Aston - 14:26
email.
Oh, okay, perfect.
Yeah.
And

Ari Vivekanandarajah - 14:28
so y'all will get the email from me.
So anyone tries to log in, it'll just send email to everyone.

Kate Aston - 14:37
Awesome.

Ari Vivekanandarajah - 14:39
We just need to add the card.
So we just, we have only about 200 credit or 300 credits.
And then we'll be able to get more credit so then you guys can chat to it.
Also what it can do is get, so it can link to LinkedIn, it can go scrape their website.
So it'll give you like this is what they do, this is the person.
And then you don't need to do any research.
It's just the document that you have and you read it and then you can chat to them.

Ari Vivekanandarajah - 15:09
Awesome.
And is this

Kate Aston - 15:10
something that I can use as well if I'm running to sort of change and change the parameters and...

Ari Vivekanandarajah - 15:19
Yeah, absolutely.
So what I think I guess we've got to decide.
Look, Siva, I guess the question for you, is it only Kate who's going to use it in which case she can change it or she'll have to duplicate this and run her own sub-agent.

Kate Aston - 15:33
Yeah,

Siva Gounder - 15:34
I think it would be good to have our core and that we should just as a team agree, verbally agree that we'd not going to change the main agent.
And that if we do, but then you should be free.
If you want to reprompt it and so on, then you should be able to do that, but maybe just in a duplicate, make your own version.
But I'd like to have like a master copy.
a master agent.
The thing is, if we go and create a duplicate, now we've got two agents checking HubSpot on a daily basis.
So we'll have to, and obviously using up tokens to do so.

Siva Gounder - 16:12
That would be the case, right, Ari?

Ari Vivekanandarajah - 16:14
Correct.
Yes.

Siva Gounder - 16:16
So then we probably, if we, I would say maybe, Kate, what would be better is use Ari as your technician, right?
Because he knows this tool rather than you having to go through the learning curve.
Yeah.
Not a great use of your time.
So you probably just work with Ari and go, look, can we tweak this and just the one, that

Kate Aston - 16:32

might be the better way to do it.
Yeah, that's And that's good

Siva Gounder - 16:36
also then we have Ari as the kind of the SME on this, the subject matter expert and sales can then feed in feedback to marketing that we can tweak it and

Kate Aston - 16:48
kind of.
Mm-hmm, perfect.
But I think the basic

Ari Vivekanandarajah - 16:51
stuff I think it's fine, right, for Kate to do.
Like, it'll be good for her to have the control to be able to

Siva Gounder - 16:59
change

Ari Vivekanandarajah - 17:00
it.
Yeah, yeah.
But maybe

Siva Gounder - 17:01
not create multiple agents because then we'll have lots running in parallel.

Ari Vivekanandarajah - 17:06
Correct, correct.

Siva Gounder - 17:06
Everyone view good thing.
Yeah.

Ari Vivekanandarajah - 17:10
So in terms of use case, so one of the things that I did before we create that version i'll show you the one i did
because I signed into this.

It's not

Karen Grlic - 17:56
like this.
So what I did was

Ari Vivekanandarajah - 17:59
I created an automation whereby it checks.
Is it not telling me how not?
Thank
I'm

Karen Grlic - 19:05
going to be explaining.
Okay,

Ari Vivekanandarajah - 19:06
so what I did was, um, is I asked it to like check on a daily basis for the last 24 hours any enterprise clients signed up and then drop me an email to my email.
So daily does a check and if there is any enterprise plans, it sends it to me.
So that's a pretty good use case.
So, you know, if you have any particular use cases that you can think of, and if you let me know, I can absolutely add that, add that in as well.
So this

Siva Gounder - 19:43
is doing, this is a daily check, right?
Does it, or is it doing it?
So you can

Ari Vivekanandarajah - 19:49
manually trigger it, Siva, based on what you want, so you can chat to it and trigger it, or what you can do is automated so that it does a daily check for the last 24 hours.
But initially, I guess before we start the last 24 hours, there's 40,000 records, we'll need to check and figure out.
And that was

Siva Gounder - 20:03

what I was going to ask is if we do a retrospective to give Kate an initial target list.
Correct, yeah.
Yeah.
So maybe that's the

Ari Vivekanandarajah - 20:15
first step.
Maybe

Siva Gounder - 20:16
the outcome of this is you to book a session to actually create, just work through.
I mean, we don't need 1,000 records.
You probably just need 50 to 100 for now that you can kind of deep dive.
Yeah.
So I think that would be good.
And Karen, if I guess Ari's going to be asking you for a credit card or something at some point if you could help with that.
So this is the

Ari Vivekanandarajah - 20:43
one I did on mine before I set it up on.
Because this is on your credit

Siva Gounder - 20:46
card at the moment, right?

Ari Vivekanandarajah - 20:47
Yeah, yeah, this is so.
So this one, so what it did was, so for example, it checked today morning.
It said there are 16 companies were added into HubSpot, but I met the enterprise threshold because I've set threshold of what enterprise is.

Siva Gounder - 20:59
And Delta, for example, my cousin works for Delta.
I mean, they're huge.
They do, you know, so there's some, and basically what, so.
what that's saying is that someone from Delta joined up in the last whatever 24 hours.
Correct.

Is that what it's saying?
Yeah, that's right.

Siva Gounder - 21:15
And they are not a pro, they're just signed up just a new registration.
Yeah, exactly.
Yeah.
So opportunity there, Kate, as then you go off and see how many deltas we got in, do your secret squirrel, who's who, and then reach out.
But that too

Ari Vivekanandarajah - 21:31
can be automated.
Like for example, we check who did it, who signed up, look, their LinkedIn, then gives you like a small report of this person, here's what they do.
And then that way you've got the data,

Siva Gounder - 21:43
including.
I think, and I'm all for automation.
I'm also a big advocate of knowing how to manually do it

Ari Vivekanandarajah - 21:51
first, absolutely.
And then automate

Siva Gounder - 21:54
it, because then you can keep the systems honest.

Ari Vivekanandarajah - 21:56
Because if you just

Siva Gounder - 21:58
automate from day one, you don't really know.
That's, and you already have that skill, Kate, but it would be good to just get into that regular thing.
Just do it manually for a bit and then automate the whole thing.
That's amazing.

All right.
So that's great.
I really like that.

Kate Aston - 22:14
Really good.
Cool.

Ari Vivekanandarajah - 22:17
So Karen, I'll reach out to you at the car details in.
Or actually, if you want to log in and do it, you can do that as well, Karen.
The car details in.
No worries.
Then
the next thing is the presentation for enterprise.
See, is that feedback completed from your end?

Ari Vivekanandarajah - 22:45
No,

Siva Gounder - 22:46
it is not.
Okay.
Close, but yeah.

Ari Vivekanandarajah - 22:51
Do you want me to get started or wait for you to finish?
I have

Siva Gounder - 22:53
four use cases I need to create.
Today is a bit of a write-off, but you could get started.
I need to almost hand over because I just made lots of notes on it.
Yeah.
I also wanted, Kate, at some point, you were suggesting last week to take a look at it as well.
slows things down i mean i'm the roadblock with this at the moment so

Kate Aston - 23:20
it's more just um without being precious because i'm going to be using it to present a lot i just want to comfortable from my perspective that i'll feel comfortable using it

Siva Gounder - 23:35
absolutely that's

Kate Aston - 23:36
my only thing i want to be precious but

Siva Gounder - 23:40
No, that's all right.
Well, why don't I give you the link to look at my comments and we'll maybe distill it so that when we go to Ari, he's got a clear, because the worst thing we could do is I say some stuff to him and then you look at it and then you say a different thing and then sort of completely

Kate Aston - 23:56
agree.

Siva Gounder - 23:56
Yeah, maybe you and I should just get aligned.

Kate Aston - 23:59
Yeah, perfect.
A

Siva Gounder - 24:00
famous word alignment.
Yeah, so maybe I'll

Ari Vivekanandarajah - 24:06
drop you this link.

Siva Gounder - 24:07
Yeah, that's my one with your

Ari Vivekanandarajah - 24:11

comments Yeah, and that way you can check the comments as well, Kate.
So you

Siva Gounder - 24:17
should be able to click on my ones and reply and or add your own.
Can just, yeah, there's a thread so you can reply those.
Okay.
Look, the what I also wanted to say.
And I apologize if I sounded a bit harsh.
I was just a bit frustrated with us running off in different directions.
It's not your fault, Ari.

Siva Gounder - 24:40
It's you being asked to do this stuff.
But we've spent with the MBA, I actually got a data report from Nishal, which I will show you guys.
And this is the why I want us to focus because this is so.
You know, Jerry's done two seminars.
He's spent whatever his own time, and that's his prerogative.
He's driven down to, I think, Goldman might have gone to Goldman, hell of a drive.
And then he did something in manually.

Siva Gounder - 25:13
We've had two new licenses sold from two seminars.
Right.
And since we started, this is all time, Rick, all time.
We've had 72 from new users.
The 61 that we sold, they were already on our systems, but you could argue, okay, let's put them, let's give them the benefits.
It's 133 all up, which is generated revenue of 26K.
It's not bad.

Siva Gounder - 25:40
It's about two grand MRR, right?
It's not bad, but it's not great.
It's far from great.
If you know the amount of effort we've put into the MBA and that ROI, there is no ROI there.

Now, at the moment, it's a badge, actually, it's endorsement, which we can say to the industry, but for us to continue to pour resources into this relationship is just not a not a great, when we could get Kate another ultra building or another fair brother, you know, a Delta group, a Mervac this
morning.
right so that's but

Ari Vivekanandarajah - 26:21
what is the strategy though see what because I think I think it is a gold mine of like info I think I think it shouldn't be Jerry going and doing presentations but I think there is a strategy that we need to

Siva Gounder - 26:33
I think I think there is because there's 8,000 members here right but they're not forthcoming with giving us that data however they publish them on their website so we could scrape that data do a campaign and approach them and say hey did you know that you've got an MBA thing that could be
predominantly marketing driven initiative and then of the 8,000 there'll be probably two 300 that are enterprise and those ones could we could somehow filter them and they would generate consults for Kate so there is a strategy there but that you know like whatever we create for the enterprise
builder strategy could be applied to this group this is just a subset of the overall market

Karen Grlic - 27:22
and vice versa

Siva Gounder - 27:25
and vice versa what do you mean by that well anything

Karen Grlic - 27:29
that's created specifically for the MBA can and that is already created specifically for the can be Could be,

Siva Gounder - 27:37
could be, so yeah, in one way we might say we're going to test our enterprise builder strategy on this cohort.
It would be a, against the, like we would be gorilla because they're not giving us their database.

We would be scraping it and then without their approval going and contacting their customers.
But also

Karen Grlic - 27:57
too, the thing behind that is, we will be guerrilla, because if we can scrape it, and that is something that we can do.
If we can just do And we don't have to target them with, hey, MBA, you've got a special offer.
We just are targeting them.
We're

Siva Gounder - 28:11
just targeting the market.
And it just happens to be that this is the MBA.
So we just have to be aware of what we're doing.
Whatever it is, we still need that builder strategy.
And that's why I think... You know, I really want to get this down because I think that's our fastest path to getting out of this little revenue glut we're in or lack of revenue glut.
And one

Karen Grlic - 28:37
other thing that if I can interrupt, and I know that this is probably something that everybody's working on, but an overall, and I know we're presenting on Wednesday with the enterprise building, but do we have an overall plan for marketing?
Because if you're thinking, for example, Ari, it's... Are you thinking that maybe this might be the really best way to go down the track, let's focus on here, or let's focus on this, or let's focus on that because we all have all different ideas, but you know I don't know all the ins and outs and
all that kind of stuff.
So I'm wondering how what your thoughts

Siva Gounder - 29:24
That's the purpose of this.
We're just doing a little bit of housekeeping, but the core purpose of this meeting is to go through the actual marketing strategy, the enterprise builder marketing strategy.
Yeah.
Which is what you're asking, right, Karen?

Is that what you're saying?
Is there a strategy?
Yes, but also overall and also is that the best way?

Siva Gounder - 29:46
It is,

Karen Grlic - 29:47
it

Siva Gounder - 29:47
is.
So this is where I'm kind of injecting myself on, because if we go for an overall marketing strategy, we're now going to consider architects, certifiers, builders, DIY, education, you know, and it's, and what we have, we were just on that call with David Springer, and he said, architects are tight
arses, they don't want to pay.
And we know this, we've, I've lost count of how many architects I've pitched.
They don't want to spend money.
I don't mean,

Karen Grlic - 30:13
the biggest

Siva Gounder - 30:14
architectural groups in the country and they don't want to pay us.
So whereas builders, they're like, oh, it's a no-brainer.
So we need to focus.
We should focus on enterprise builders.
Yeah, I meant plan.
Plan for the year.
Yeah, and so start with this focus and then we'll, because we only have 20 hours of Ari.

Siva Gounder - 30:36
That's not a lot of time.
So I want to start where we can get meaningful ROI.
and then stretch.
Otherwise, we're just not resourced.

This team is just not resourced to do everything.
So we got to focus.
So with that in mind, this is what we're up against, guys.

Siva Gounder - 30:54
So if we're the four of us are having this conversation, you're going to get it on Wednesday again.
Oh, we should do this.
We should do this.
Why are we doing that?
Why are we doing that?
It's like, here's our reasoning.
So there's a bit of a why.

Siva Gounder - 31:05
Why should we target builders?
You know, the highest propensity to pay us.
They're our biggest customers right now.
So, apart from TAFE, NSW.
So, yeah, so anyway, let's go through that.

Ari Vivekanandarajah - 31:25
Yeah,

Siva Gounder - 31:26
cool.
Do you, do you guys, and look, I don't want to be standing on my soapbox here preaching, but do you guys agree or do you think, because I'm open, I'm open to other ideas, Kate, Sharon, Ari, like, do you agree with this approach?
Yes,

Ari Vivekanandarajah - 31:48
so whenever I've done marketing we've always had an enterprise strategy but we've also had mid- tier and a lower tier strategy.
and we progressed all of them along.
Now, with enterprise, because there more sales involvement than marketing involvement, because once I set up the framework, it's more its role than it is mine, right?

So what happens is, like, of course, we work together to say, okay, here is what we need to do with you, so we need to hit any email campaigns that need to go out.
But I know the limitation is time and that's what we need to figure out there we focus.
Yes.
And money.

Ari Vivekanandarajah - 32:37
But like light touch into the other areas is something we need to think about.
Which you're doing.

Siva Gounder - 32:45
And

Ari Vivekanandarajah - 32:45
you're just sharing with Google.
Yeah.
Which you're doing

Siva Gounder - 32:47
with Google.
You're going to do with Meta.
There's a small budget there where our plan is to reinvest that money.
So, you know, it's probably not fair.
So you're right.
Good correction because... We are doing a little bit on generic marketing, brand raising, raising awareness and on.
Yeah.

Siva Gounder - 33:07
My

Kate Aston - 33:07
thing, and yeah, it comes back to, we don't have the resources and we don't have the budget.
The big fear for me, if I'm talking in all honesty, is enterprise is always going to take longer.
Like it's, you know, it's always going to be, you know, very rarely are you going to get you know, even if they're not your Mervax or whatever, they're still going to take, you know,

the best part of a month, if not more, longer, and to make a decision, because it's not seen as absolute urgent
priority.
And it's still, even though we're very cheap and too cheap, it's still, you know, it's still money.
And so I, my theory is, the longer we wait to start the lower T stuff that can happen in the background and doesn't require so much effort to get them across the line, the longer takes for us to actually just get something like that's, we're not really focusing, we don't have a mark and that's not
Ari's fault.

Kate Aston - 34:19
We don't, it's because of budget and time, we don't have a focused effort on what is like the bread and butter and just keeps the lights on, once it's, you know, Ari's, it doesn't require multiple stakeholders in our team, to be honest.
So that's my only fear.
But it comes down to it, you know, end of the day, it's got to be a willingness to spend or, you know, not a willingness, there's got to be money there, but that's the issue.
It's like almost that cart before the horse thing.
because that's what's actually going to keep the lights on whilst we work towards getting these bigger players across the line.

Siva Gounder - 35:07
Yep, yep, all valid, valid thoughts.
And so, yeah, and it's not really a willing, well, there previously wasn't that much of a willingness to spend on marketing, but that's gone.
And now there is a willingness, but there's a lack of ability.
Right, so we only have a certain budget to put on generic marketing.
And it's for that reason that I've really probably been pushing Kate on let's, we're going to have to do some old school outreach, follow- on that type of stuff.
But you know, again, we have, we have the product.
You know, Mervak took two years to realize that.

Siva Gounder - 35:43
Now they've come back this morning, FYI, Ari and Karen, right, going, oh, yeah, maybe you guys are the right solution for us.
So, you know.
And my goal is to get that budget, the generic marketing budget up.

I want to get it up to two grand as soon as possible and three, five, ten.
I mean, if survival can spend 10 grand a day, I want to spend 10 grand going to take some time, right?
But that's the reality.
So in the meantime, we have to drum up some business.

Siva Gounder - 36:17
So maybe as part of this, actually, coming back to your original question, Karen, which is a good question.
It's what else?
What's our overall plan?
So maybe our overall plan we're saying is, as much as we can afford in generic marketing right now to raise brand awareness, drive registrations, and that'll be, that'll be, I mean, those are AS3000, so that's electrical.
There'll be electrical customers.
And that'll keep the lights on, so to speak.
Hopefully those campaigns will be paying for themselves.

Siva Gounder - 36:50
And then we'll also be drumming up business and enterprise.
Yeah.
Maybe that's the way to position it.
It's important for us to be clear on that as well.

Ari Vivekanandarajah - 37:06
Yeah.
How do I work this likely?
But we also need a project for Jerry.
Well, I told

Siva Gounder - 37:13
him, I told him just now on the phone.
I was like, you know, you know, Jerry, because he was, he's talking to me.
I knew he's talking to me about that video.
And I was like, Jerry, you know, you've got professionals.
You've got Kate, you've got Ari, you've got me.
Can you just leave the sales and marketing to us?
And he didn't push back.

Siva Gounder - 37:32
Actually, a couple of weeks ago, he would have pushed back on that and got, no, what are you talking But now, I just said, can you just give us an opportunity, please.
Just let us do our job.
And so that's why this presentation, it's really, it's for Jerry.
It's for us, but it's really for him as well.
Yeah.
But what are you thinking, when you say project for Jerry, like, what do you, something keep him busy?
Yeah,

Ari Vivekanandarajah - 38:04
pretty much, because like, if, like, what I've noticed is, like, he comes to me with a lot of requests.

Kate Aston - 38:11
And

Ari Vivekanandarajah - 38:14
I feel if he don't go down the MBA paths, then it'll be another project that we'll have to work

Siva Gounder - 38:25
I, you know, I think I spoke to, I spoke to Mike, Mike is his nephew, Kate, and the CEO of survival, which is the first day business.
And Mike said the only reason Jerry's doing that is he feels a lack of control because there's a lack of results.
I actually think when we start landing some enterprise deals, when we start showing CPAs, cost per acquisition on our meta and Google campaigns, he will relax.
This behavior at the moment is a product of us having our backs against the wall a bit and we need to drive revenue.
And he's like, okay, if it is to be, it's up to me.
And he will just charge.

Ari Vivekanandarajah - 39:11
Right.
And

Siva Gounder - 39:12
if you follow him, you follow him, if you don't, doesn't matter, he's going.
Right, okay.
So he

Ari Vivekanandarajah - 39:17
wants to see one thing working and he'll focus on that.

Siva Gounder - 39:20
Yeah, if he sees us to drive success, he will relax and relinquish control.
And that's the problem right now is he's not seeing enough sales and marketing wins.
And so he's going, well, I'll just do And he doesn't, what does he know about sales and marketing?
Not, not a great deal compared to the people on this call.
Right.
But he will do it because that's who Jerry is a get it done guy.
And that's his strength and his weakness in the team.

Siva Gounder - 39:48
So what I'm what I'm positing to you guys is let's let us do and he'll relax.
But we just need to do some stakeholder, which I can do a lot of Ari, you'll have to do some.
Kate, you'll also need to do Share wins with You know, give him a call, have a chat with him and say, hey, this is happening.
That's

Kate Aston - 40:04
happening.

Siva Gounder - 40:08
And I know this, I know this because I've worked with him from day dot on tools.
I know how he operates and he's in an agitated state at the moment, which is, yeah, we're in you know, and we're in a position where we've got this amazing product.
People want and we just kind of on the precipice of driving sales, but we're not quite

Kate Aston - 40:31
Yeah.

Siva Gounder - 40:35
I hear what you're saying, Ari, and I acknowledge but it would be a mistake.
I think better to do awesome stakeholder reporting, beat the drum, say, this is what we're doing.
Sales and marketing have got This is where we're going with this project.
And I think that would be a better way to approach Because Jerry would rather actually relax and he loves 500. He plays cards.
He's had, he stopped playing basketball.
He stopped doing things that are good for him.
because he's worried about the project.

Siva Gounder - 41:10
So he would rather do those fun things than look at subtitles on a video.
Anyway, I'm getting preachy, I'm sorry.
With that in mind, what do you got for us?

Ari Vivekanandarajah - 41:31
All right, so are this in two versions?
One is in the version that makes things easy for me to understand.
But then I also got a version in a presentation format.
Thank
So we've got two forms of attack in here.
So I've got the Google meta, the self- serve process, which is the discover, consider trial pro, and then we capture the guys who are coming into enterprise from there and then move into the enterprise process.
With enterprise, it's about identification, outreach, engaging them with different content, qualifying them.

Ari Vivekanandarajah - 42:41
proposal and then kind of close.
What we're aiming for from a Google Meta standpoint is to have trial start from both sides, Google and Meta to sit around $8 a conversion per sign Now the pro-conversion data we still don't have any to fall on.
If we currently look at it, And I'm just guessing it could be close to $120.
But then I don't know how many of those actual converting.
I saw, like I tried to manually map it using Google Analytics data.
And I saw, think out of, was it?

15 signups, 30 signups, I saw two, 30 trial signups, I saw two confirmed conversions.

Ari Vivekanandarajah - 43:42
But there could be more that we're not really looking at because we don't necessarily have the data.
So it could be a lot lower than that.
But if it's $120, it's a bit of a worry, in which case we need to focus on how do we move them from the free to trial to a close.
So one of the projects that we need to kind of really get and fix is once they come on trial, how do we ensure that process of moving to a pro is seamless from emails, online marketing, from the app standpoint, like how do we kind of fix that I know we're looking at churn reduction, which is once
they sign up, they're going off, but we also need to look at how do we make sure that a trial sign up is becoming a pro.
That percentage has to be increased significantly if this data is correct, because 30 to 2 is extremely cool.
from a time sign up.

Ari Vivekanandarajah - 44:35
Now, that said, meta quality could have been lower.
Having Google in the mix could have good fixes or the data that I'm looking at from GA4 could be inaccurate.
Both are equal possibility.
So we'll know a little bit better once we have that.
The aim is to get to a budget of about 30, 3,000 to 5,000 dollars per month.
And again, it's going to be all based on how much money we actually do get and about reinvesting that money and to reach about 300k in recurring revenue through this process.
Now, I have incorporated all of Kate's notes into this.

Ari Vivekanandarajah - 45:33
Now, so if you look the process, so we've got the enterprise data gathering which needs to happen inside of HubSpot.
So we've got the ICP and account tiering.
So here, what we're trying to do is to define, we don't want to define every enterprise customer as the same.
So we'll need to identify who the whales are.
We need to identify those top 15 companies and we need to kind of align on who they

are.
then tier two and then tier three, and altogether what we want to do is to have about 100 customers which we focus on as enterprise.
The main focus will be on the 15. And I think identifying those 15 would be the first priority task, Kate, between you and me to figure those 50, 100 customers, but also see why I think, and Karen, you guys have a lot more information and know this industry lot better to be able to help us and say,

Ari Vivekanandarajah - 46:33
yeah, this is right, this isn't accurate.
Then it's about a buying committee identification.
We'll need to ensure we've got the right champions inside the organization, who those people are, who will be driving the decision making, identifying who those end users are, and then who is going to sign off finally.
within each company, identifying who they are, and also identifying the actual person behind and their LinkedIn profiles and really building out an enterprise plan per company that we can then define.
Now, we don't want is a generic persona that we are going to focus on because in each company there might be slight differences in designation.
So when we are running LinkedIn ads or we are sending out email campaign, it's very targeted at that particular person.
Now what we haven't spoken about in all of this is the LinkedIn ad strategy only because only because we haven't kicked that off because I've put LinkedIn ad strategy as part of enterprise only rather than the generic overall brought aspect.

Ari Vivekanandarajah - 47:46
Also LinkedIn is more expensive.
So with $1,000 budget, that's not something we can kind of focus on initially.
And Karen, I spoke about this to Siva, just for your information, Kate will already know this.
Like CPCs in Google and Meta sit around.
a dollar 20 sometimes even lower than that.
That is cost per click.
But in LinkedIn it used to be around $70.

Ari Vivekanandarajah - 48:15
It's come down to $24 and recently we're seeing about $10 CPCs.
That's just crazy.

Yeah.
Crazy.
Yeah.
So we are looking at, you know, for $4,000, we're looking at 100 clicks.
So unless we've got a very good conversion journey, we'll end up wasting money inside LinkedIn, unless we've got that really fine tuned.

Ari Vivekanandarajah - 48:38
So it'll work in enterprise because we really target who we want to And so therefore, even if the CPMs are high, we can still kind of hit them the revenue will justify the cost.
Then, once we identify, then is the intelligence gathering.
So again here, we don't want to rush this.
We want to make sure we, for each person, for each company, we gather the intelligence behind it, who they are, what they do, where they're going, how do we kind of approach them, what is the language, they're communicating, what type of information, are they posting online.
So we identify a lot that.
Now, what I've suggested is that this task must be done using some sort of AI automation because otherwise, like back in the day we used to do this manually because had, you know, I used to have like five six person research teams who used to sit just that's their job for enterprise.
But now with AI I think we should be able to automate a lot of this.

Ari Vivekanandarajah - 49:46
So we then provide that through that research, we feed that data to Kate who's got his equip with this information to be able to give them a call.
From there, we have two branches.
So there are known contacts within the CRM.
So after we identify, we then look at our CRM and say, hey, look, yes, here's the known customers.
Now, ideally, you want 90% of the data that we are covering here to be in our CRM because that's easy, low-hanging fruits.
But then there might be companies out there that are not in our CRM, which are considered to be enterprise and big.
For example, let's say there's Hickory was not in our database.

Ari Vivekanandarajah - 50:31
We still include them and then we'll come up with a strategy for Hickory.

We will follow the external path of enrichment and reach out.
But we are hoping that 90% enterprise customers are sitting here.
Just because they aren't there, we don't want to be not attacking, not attacking Then, which one?
Yeah.
Then then we've got lumpy mail out content strategy for the known customers.
And again, I've got, Kate, your notes as well wherever you've kind of incorporated, I've incorporated them into our process.

Ari Vivekanandarajah - 51:21
And then we've got a content strategy as well for how do we kind of attack these particular customers.
From there we also have LinkedIn outreach.
We've, I've left this in.
based on what me and like Kate discuss and also based on the context that I mean, based on the notes that Kate shared.
Similar is there is a strategy here from an event standpoint.
I'm not saying we invest money or push money into this immediately, but I just want to be able to put this in front of them so that they can also think about what involves.
Now, for example, MBA getting MBA could have something and that could be one of the events that we are going for, but I'm not saying every month.

Ari Vivekanandarajah - 52:20
It could be one massive one that the kind of holes that we reduce the amount of time we spend on this.
But we just want to make sure that the event marketing component is also there.
Personalized videos and then personalized landing pages are also something for us to build Kate, you didn't see this.
Sorry, Karen, you didn't see this one.
So let me just show Will I build it for?
I built it for Hickory.

Siva Gounder - 53:01
I guess one of the things that this is, I don't know if this is what you're going to be showing the guys, but it's difficult to see the phase roll out, the implementation of this, because kind of like an overall, isn't Yeah.

Ari Vivekanandarajah - 53:15

So that's one.
So I have two versions of this.
One is this, which for me makes a lot

Siva Gounder - 53:21
of sense.

Ari Vivekanandarajah - 53:22
Yeah, which I figured they wouldn't.
I need to put this into our brand colors, but I've also got this version which breaks it into phase one, phase two, phase three, and the rollout plan as well.
That's what I was going to ask you a question is, do you think they will understand these or do they prefer a presentation?

Siva Gounder - 53:47
This deck is pretty busy.
Just on that very quick skim you did.

Ari Vivekanandarajah - 53:52
Yeah.

Siva Gounder - 53:54
Yeah, I would keep it simple.
Presentation.
And I think that deck is fine to use, but you probably want to, I don't know, use notebook LM or something and just say simplify the messaging on here.
Yeah.
It's too complex.
Like I, like, I think for our conversations, we could do that, but you probably, if you're going to do slides, then you probably do like three.

Ari Vivekanandarajah - 54:17
Like how detailed do you want it to be?
Because I wanted to make sure we captured everything that needs to

Siva Gounder - 54:23
get done.
Maybe this.

You

Ari Vivekanandarajah - 54:25
don't want to oversimplify Because it's not,

Siva Gounder - 54:28
yeah.
It's not,

Ari Vivekanandarajah - 54:29
exactly.

Siva Gounder - 54:31
Yeah, it's a good question.
Maybe now looking at this, maybe this is the way go.
Kate, what are your thoughts?

Kate Aston - 54:40
prefer the slide deck.

Siva Gounder - 54:43
You prefer the deck.

Kate Aston - 54:44
Yeah, I just don't know where look.
I just think for non-marketing stakeholders, it's hard to

Siva Gounder - 54:52
digest.

Kate Aston - 54:54
But I think, yeah, you only need probably three or four slides.
Maybe

Siva Gounder - 54:59
you could show this as an overall and just say, look, this is the overall omni- channel approach.
This is what it, just to simplify this because it is complex and that might show them that,

oh, we didn't just roll out of bed and come up with this.

Ari Vivekanandarajah - 55:15
This is

Siva Gounder - 55:16
a well-thought-out thing, but hit the slide deck is the way.
And I was kind of, I was talking about customer journey.
Can you bring that up again?
I mean, we could maybe just take a quick your

Ari Vivekanandarajah - 55:32
The other thing

Karen Grlic - 55:33
that you could do when you're presenting is to just have a simplified version but say we do have this, you can send you to read at your own leisure.

Siva Gounder - 55:41
No, well we don't.
I don't want You know, I mean, ask questions.
Well, I'm blocking it, that's where things spin out of control.

Karen Grlic - 55:52
You know, that's good

Siva Gounder - 55:53
too.
We want to show We want to present We want to get buy--in.
So of course, people have every right to question, query, poke holes And we need to be ready for But then I want to be able to stamp it and go, let's go.
I don't want this thing to spin for another two weeks while we're trying to get, you know, I want to get into execution.
Yeah.
I'm not sure, Ari, how best to... Well, you

Karen Grlic - 56:21
know them too, Ari, you kind of have a feeling when you speak to Jerry, what he kind of

wants to see.
What

Ari Vivekanandarajah - 56:28
are yours?
Yeah, like I've not done a presentation to him, so I don't know.
I, what I've noticed from Jenny is he likes visuals more than like words and text.
So, which is why, for me this was like an easy way.
And if you look at the background of this, it's actually a building.
So,

Karen Grlic - 56:51
so.

Ari Vivekanandarajah - 56:53
That's the

Siva Gounder - 56:54
building.
Oh, you should open with that.

Ari Vivekanandarajah - 56:57
So it's actually going from ground floor all the way up to the penthouse.
So what are the

Siva Gounder - 57:01
color, the, if you go down to the bottom, what stage of the funnel is this kind awareness, this whole Correct.
Where's the marketing funnel fit into this piece.

Ari Vivekanandarajah - 57:13
So I've got, so I've got it here,

Siva Gounder - 57:16
ground floor, first one, awareness, awareness.
Yeah.
So I think this could work, but to Kate's point, which pathway do you follow, which
Where do you start here, I you go.

Ari Vivekanandarajah - 57:42
Yeah, so it starts from here, but then I understand like I can see it because I built like part all of it.
But I think like with all those lines running around, they might get confused.

Siva Gounder - 57:54
Well, it's really the storytelling.
So it's depending, I mean, if you're going you want to say a journey, all right, to bring it back into reality, because this is just a thing on a page.
If you say, okay, so I'm a builder now.
So let's go to the start.
And

Ari Vivekanandarajah - 58:13
maybe zoom in on.
So based on whether they are, so the parts they take is based on whether they are a known contact or they are not a known contact.
So up to here is research.
Once they are known contact, they follow a certain path.
If they're an unknown contact, then they go through these parts.
Yeah, and a known

Siva Gounder - 58:34
contact.
And so what we might start with and say, well, our database is full of known contacts.

Ari Vivekanandarajah - 58:40
Correct.

Siva Gounder - 58:40
So let's start there and maybe we don't even go down the generic at this point.
And go on a journey with somebody, but make it real.
Yes.
All right, this known contact.
So what's the first, where does the known contact go to first?
So if we start on the, there, what's the first touch, touch

Ari Vivekanandarajah - 58:59
So this is, I think, Kate, you want to do the lumpy mail out first in the document.
So I'll put that as the immediate

Siva Gounder - 59:09
So as our first action, actual, a mail

Ari Vivekanandarajah - 59:18
out.
Yeah.
So this is from a marketing standpoint, right?
So this is not called.
Yeah.

Siva Gounder - 59:25
So it could be a mail out or, okay.
Because you've already done, you've already done an EDM version of the lump email, right?
Correct.
So maybe as yeah, okay.
So then you go lump email and then, maybe follow that path, that journey.
So talk, talk about it from the perspective of the end user.
Yeah.

Siva Gounder - 59:47
So Johnny, the person has received a thing.
land and expand PLG.
Then they get a personalized video.
Yeah.
Because the events roundtable is future.
So I would maybe almost, even if you want to, so you don't lose this.

Ari Vivekanandarajah - 01:00:10
Gray down.
You gray

Siva Gounder - 01:00:11
out and it's not, there's no movement down any paths that aren't, we're not initially

implementing.

Ari Vivekanandarajah - 01:00:19
Correct.

Siva Gounder - 01:00:22
Yeah.
So I think what you could use this, but what you need is a story like a, and I think that would be good for everyone.
Just to say this is an enterprise builder, it's quality manager or she's a design manager whatever the roles This is what they get.
These are the act, the action they take is this and then kind of follow the journey of a person.
And one of

Ari Vivekanandarajah - 01:00:48
the things I noticed, and I could be wrong here, Jerry asks for details.
Like, he'll ask for like, okay, now explain to me when we're talking, I was talking about the meta ads and Google ads and so he's like, okay, explain to me what does it involve?
Like he wants to know what that process feels like.
um and so i saw like if you have this level of detail i can always just bring it up and give you after the question i can explain that process them

Siva Gounder - 01:01:19
yeah

Ari Vivekanandarajah - 01:01:19
whereas in the presentation that might be a bit difficult or we have

Siva Gounder - 01:01:23
both yeah and i think what's missing is that real life story because then here you've got lumpy mail land and expand plg but what is that you know lumpy mail is a physical reach out so you know sam gets this and then what So I guess you've got them in there, don't

Ari Vivekanandarajah - 01:01:39
you.
So I've got certain versions of it.
For example, I've got a like a Hickory landing page, what it looks like.

What I can do is I can and again, I'll say, look, this is our final version.
There's a samples.
We'll create actual versions of this.
And so they can, they know exactly what's coming.

Siva Gounder - 01:01:57
That is the, yeah.
And look, and even if you just.
have nano banana or whatever,

Ari Vivekanandarajah - 01:02:02
just get

Siva Gounder - 01:02:04
examples.
We don't expect you to create all the collateral on day

Ari Vivekanandarajah - 01:02:07
Exactly.
Limit the

Siva Gounder - 01:02:08
paths, know that the paths are there, but gray them out and remove the movement.
And we go down a particular path and each path, each one of your hotspots has got an example.
Because nothing, like that Hickory example is great.
That's straight away, you're like, oh, I understand Exactly,

Ari Vivekanandarajah - 01:02:26
exactly.
And maybe what I can do then I'll grade the phase one path.
I mean, I'll call it the first one, paste one because that's phase one, right?
And then maybe I can do click phase two, shows us what we're going to do next.
And then that shows up and then phase three.
Yeah, because we're going to be able to implement all this in one.
No,

Siva Gounder - 01:02:52

and that's right.
And so because probably what, and this is just me, me as the stakeholder, what I want to know is what are we going to implement in the next four weeks?
Correct.

Ari Vivekanandarajah - 01:03:05
Yes.
You know, four

Siva Gounder - 01:03:06
to six weeks.
What is the immediate stuff that we're going to be doing?
And I know we're not going to be doing a lot this stuff.
So what are going to

Ari Vivekanandarajah - 01:03:13
Yeah, exactly.
Yeah, that makes

Siva Gounder - 01:03:15
sense.
So,

Ari Vivekanandarajah - 01:03:17
and then anything that is live, um, like meta, Google, I'll have it in a color

Siva Gounder - 01:03:23
so I can, you can have it live because it's live right now.

Ari Vivekanandarajah - 01:03:25
Correct.

Siva Gounder - 01:03:28
Maybe when you click on maybe when you click on the meta ad, you could just have the ad copy, the creative there, just say, yes, because you, then you don't have to say as much.
So yeah, we're running ads, click, there's, there's an ad.
They land on a landing page, for example, this

Ari Vivekanandarajah - 01:03:42
could be a landing.
And we can also show the results, right?
So I'll take a screenshot of the results and show them.
Like Google is $23 here, it's $8 a conversion.
And so we can actually get into like, like Jerry will ask, I'm What is it going to cost?
What's that cost of conversion going to

Siva Gounder - 01:03:58
be?
So it's all there.
So this known contacts pathway, the blue pathway is really for our enterprise.
See, because what's missing here is who are we targeting?

Ari Vivekanandarajah - 01:04:12
That's what we don't know yet.
That is where am stuck.
Because I think that requires a lot of research to identify, okay, these are our companies we're going to hit.
Like, this is our enterprise.

Siva Gounder - 01:04:26
Yeah, we're, that's

Ari Vivekanandarajah - 01:04:29
interesting that you say Because I could get task led to do it.
Because I look at enterprise, and I think it's because of a definition of enterprise.
is what's missing.
I think can define what it is, like I've got a definition of enterprise, but I don't know if it's your definition of enterprise.
Well,

Siva Gounder - 01:04:49
Yes.
So, I mean, Kate, you put a definition of enterprise builders.
You wanted to use revenue, didn't

Ari Vivekanandarajah - 01:05:01
You're unmuted.
Sorry.
I was just actually

Kate Aston - 01:05:08
looking for... Yeah, just opening up that strategy doc again, because I think it's and again, it's, you know, we've all, oh, we've all got all agree.
So that was my,

Ari Vivekanandarajah - 01:05:25
I think this is what you had in the, I've got it here.

Kate Aston - 01:05:31
think you

Ari Vivekanandarajah - 01:05:31
had revenue over 1 billion, 200 to 1 billion and then remaining.
Yes,

Kate Aston - 01:05:42
because I had those examples.
Yeah.
Now, again, you know, that's, it's for us to kind of make a call on.
But

Ari Vivekanandarajah - 01:05:54
also, Kate, do we want to give them and for them to no, that's not what I'd consider enterprise.
Or will they

Siva Gounder - 01:06:04
not?
Who's that?

Ari Vivekanandarajah - 01:06:06
Jerry and Tim, I'm guessing both of them are there at the call meeting.

Siva Gounder - 01:06:10
No, look, they're on board.
Yeah.
Okay.
Like Tim, Tim's going to say, what he's going to say is, Siver, what you're here to drive that.
So he's going to put it back on Terry's going to have some ideas, but ultimately he knows that the customers that have put their hands in their pockets have been enterprise like the icons, the hickories, the tailors of this I don't think we're going to get much pushback
Okay.
So

Ari Vivekanandarajah - 01:06:37
that revenue is fine.
We don't need to look at employee.

Siva Gounder - 01:06:40
Well, and Kate and I kind of went back and forth a little bit on this, whether to measure them on revenue or employee size.
I mean, they're different ways of trying to achieve the same thing.
I don't actually know, to be

Kate Aston - 01:06:53
honest.
So maybe reading

Siva Gounder - 01:06:56
is the easiest bit.

Kate Aston - 01:06:58
You don't always you can't always get revenue can't always get and you can't always get team size either.
So I

Siva Gounder - 01:07:05
think it's

Kate Aston - 01:07:06

looking at there's a right there's a little bit of subjectivity to this, which is.
You know, what types of projects they're doing, what are the scale of them, what's the.
you I think there's a there's a few things because you won't always

Siva Gounder - 01:07:22
get

Kate Aston - 01:07:24
what's the revenue, you won't always get as a, or be able to find that with accuracy.
But the same regard, you might not always be able to find team size.
So I think it's a combination.
And that's how I came up with the... Enterprise, but I went one step.
I didn't define enterprise to be honest.
This was about what I think the primary audience should be in this instance.
So I said residential and commercial builders operating across complex multi-site projects.

Kate Aston - 01:07:59
Um, and I actually used.
Can you share,

Siva Gounder - 01:08:02
can one of you share, because I don't know one.
Because this is, this is the thing that I would open the discussion with, is we're targeting these people for this reason.
Um, yeah.
Can you say that?

Kate Aston - 01:08:19
Yes.
So in actual fact, this wasn't a definition of enterprise.
This was just purely who we should be targeting for the, you know, where we will get the most bang for buck.
And that's based on who established relationships previously.
And so I actually didn't put it as value in the end, because I played around with that.
I didn't put it as value or team.
actually went, the segments are... you know, tier one, tier two, tier three contractors, a commercial and infrastructure delivery, and then volume residential builders.

Kate Aston - 01:08:59
And then custom, I went, they're the segments, but our primary should be the tier two builders, both commercial builders and large residential developers builder builders that only partner with developers.
So I kind of, yeah, so I haven't actually defined the enterprise, like what enterprise, what we mean by enterprise.

Siva Gounder - 01:09:28
Yeah, so can we, I'm just trying to think, I've got to go, because I'm actually, I was to be on another Coming back to, Can we maybe just call it Enterprise Builders and say we are looking and take a couple of these notes or a couple of those examples.
Everyone will understand Ahachis, mid-- mid- tier, you know, the different levels.
Yeah, I agree.
And maybe we don't need to solve what it is, but I think really clearly, Ari, that our ICP for this strategy, which was the strategy I've asked us to do, is enterprise builders for the pure reason that we've had the most success with them, but also the highest propensity to actually put the hands in
their pockets and

Kate Aston - 01:10:21
All right,

Siva Gounder - 01:10:22
so I yeah, unless you're challenging that, which is fine.
I mean, we can talk about but are you challenging they are a target for this enterprise?
For the strategy, So that's a question for you, What's

Ari Vivekanandarajah - 01:10:45
the question?

Siva Gounder - 01:10:46
So, hey, let me just share my screen and then No,

Ari Vivekanandarajah - 01:10:49
what I'm saying is,

Siva Gounder - 01:10:51

are you challenging?
Are you challenging that we should be targeting builders, enterprise

Ari Vivekanandarajah - 01:10:56
builders?
No, no, no.
What I'm saying is, I don't know if we should define it before call is what I'm saying.

Siva Gounder - 01:11:03
Okay.
Agreed.

Ari Vivekanandarajah - 01:11:05
Yeah, that's all.
That's all.
Yeah, yeah, yeah.
Because I don't think we can define it because there's some level of research that needs to go into defining Great.

Siva Gounder - 01:11:11
Yeah, because this was the, this is, I actually showed Jerry this.
Yeah.
I said, this is what I'm working on.
I'm going to have this is just a briefing so I can hand it across Harry and then we're going to develop this.
So I think start with this like start with the statement at the beginning of your at the bottom with the start here.
What does start here Like what do those people look like?
Remember I put these notes here and again this is old now but I said build LS identify 100. Managers, biggest enterprise builders in Australia by revenue, I actually wrote, know their names, titles, big odds will be several people in quality.

Siva Gounder - 01:11:48
Primary targets, QMs.
They are most, our most engaged enterprise builders.
It has been quality managers.
This is not me making stuff up.
This is based on our customers.

They have championed the adoption of tools.
For example, Drury from Taylor, Tom and Lauren from Icon, Andrew and Mark from Hickory.

Siva Gounder - 01:12:06
They're all in the quality team.
Mariana and Alex, Kate, this morning from Mervac, quality team.
They

Kate Aston - 01:12:13
are the

Siva Gounder - 01:12:14
ones that are often

Kate Aston - 01:12:14
dry.
Exactly.
Yep.
We should

Siva Gounder - 01:12:16
target QMs.
Why QMs deal with the mess that is called when things go wrong.
They're tasked with stocking mistakes.
And then you've got your secondary supporters, design managers, construction managers, site managers, C-suite just sign stuff off.
They want to know ROI.
So that's why I put this together to help with defining the ICP.
I don't know the, I said here by maybe by revenue is the to I can share this with you again, if you like.

Siva Gounder - 01:12:45
I don't know, I have

Ari Vivekanandarajah - 01:12:45
that.
This is all based off that.

Siva Gounder - 01:12:48
Cool, cool, cool.
So that, so tell that story at the beginning and then and then show clearly which path, show examples of collateral.
think we, let's not relinquish too much power to other people.
This is the sales and marketing team.
I think you guys are professionals in your this is not your first rodeo back yourself and say this is this is how we I'm what I'm asking is I want to target enterprise builders.
That's that's my ask.
Yeah.

Siva Gounder - 01:13:19
And then it's like for you guys to say this is how we're going to go them.
Yeah.
I'm happy to talk more before Wednesday, but I've got to go And I've got you, Kate, too, right.
So.
That's

Kate Aston - 01:13:35
great.
Do you need to push it?
We won't need probably four hour and a half.
Okay, we'll let her know.

Siva Gounder - 01:13:39
Quick call

Kate Aston - 01:13:40
now.
Yeah.
All right.
Thanks,

Siva Gounder - 01:13:42
Ari.
Reach out.

We'll, we can talk more.

Ari Vivekanandarajah - 01:13:44
Okay.
Thanks.
